What the RBF one-class detector flags · biolink:treats, 9657 edges, kernel=rbf, nu=0.20, gamma=scale

The grid search selected these settings. Panels 2–4 are the diagnostic: the flags track how well-connected the endpoints are, not whether the edge is correct.

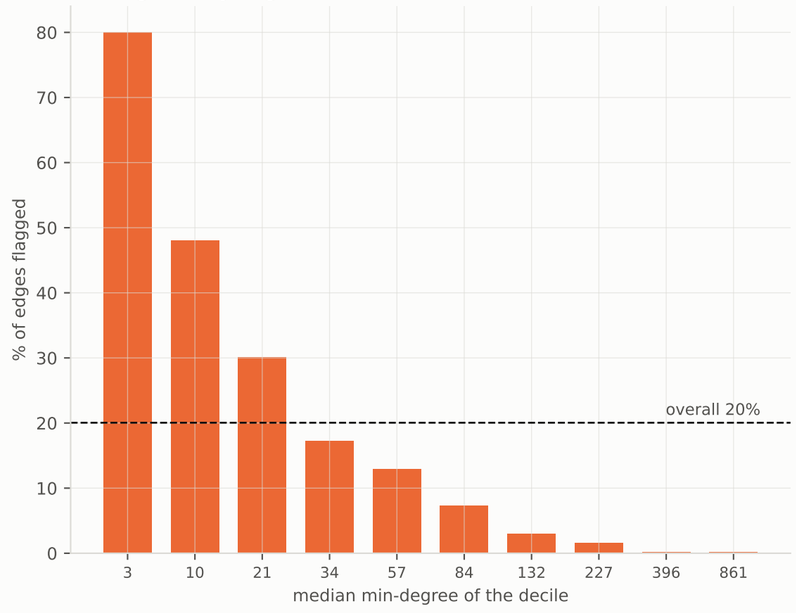

1 · Where the flags land — PCA of the standardised features

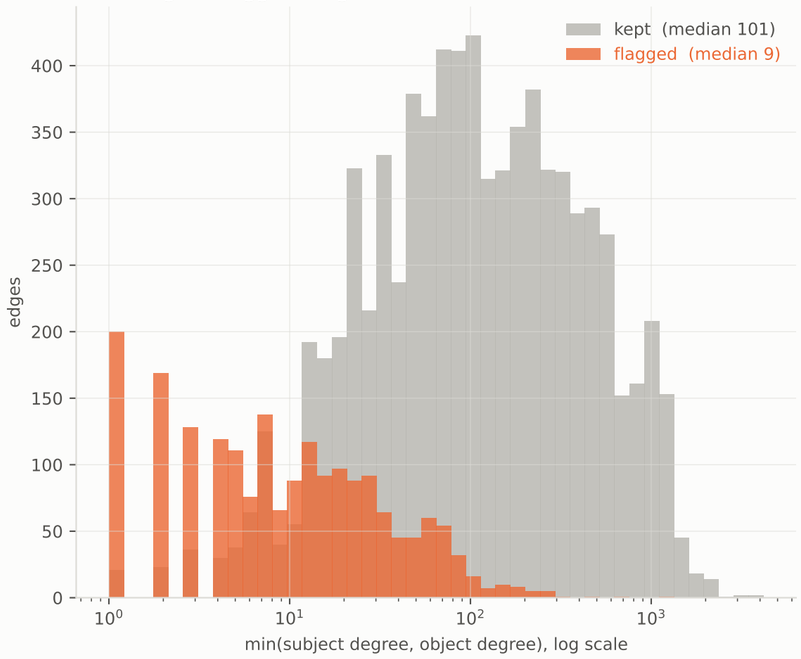

2 · The diagnostic: score vs node degree (Spearman 0.73)

3 · Flag rate by degree decile

4 · Who gets flagged: degree distribution

5 · The twelve most anomalous edges by this model
